TechNova — Chatbot Knowledge Base

This document contains structured information for testing a context-based chatbot. The chatbot should answer questions only when the required information is available here.

1. Company Overview

TechNova is a software company founded in 2022. Its headquarters are in Noida, Uttar Pradesh, India.

The company develops software products for customer support, document management, and business workflow automation.

TechNova primarily serves startups, small businesses, and medium-sized companies.

2. Products

NovaChat: An AI-powered customer support chatbot that can answer questions using uploaded documents and other approved context.

NovaDocs: A document management platform used to organize, search, and share business documents.

NovaFlow: A workflow automation platform designed to automate repetitive business processes such as approvals, notifications, and task assignments.

3. NovaChat Features

NovaChat supports context-based question answering and can process uploaded documents.

It supports multiple languages and can return concise answers based on available context.

NovaChat is designed not to invent information that is absent from its provided context.

Administrators can configure the system prompt and define the sources that the chatbot is allowed to use.

4. Pricing

Basic Plan: ■499 per month. Includes document-based question answering and standard support.

Pro Plan: ■999 per month. Includes larger document limits, advanced context handling, and priority support.

Enterprise Plan: Custom pricing. Enterprise customers receive configurable limits, dedicated support, and organization-level controls.

Prices in this document are monthly unless explicitly stated otherwise.

5. Support

Customer support is available Monday to Friday, from 9:00 AM to 6:00 PM IST.

Support is closed on Saturdays and Sundays according to the information in this document.

General support email: support@technova.example

Support phone: +91-98765-43210

6. Leadership

Founder: Rahul Sharma.

Chief Executive Officer (CEO): Priya Verma.

The document does not provide the names of the CTO, CFO, or other executives.

7. Office Information

Headquarters: Noida, Uttar Pradesh, India.

Office working hours are 9:30 AM to 6:30 PM IST, Monday through Friday.

The document does not specify a complete street address.

8. Security and Data Handling

NovaChat is intended to use only the context and data sources configured for the chatbot.

API credentials and private configuration values should not be exposed to end users through the chatbot interface.

The document does not specify a particular cloud provider, database technology, encryption algorithm, or compliance certification.

9. Technology

NovaChat is described as an AI-powered application.

The document does not specify which AI model, programming language, framework, vector database, or embedding model is used internally.

Do not assume technologies that are not explicitly mentioned in this document.

10. Business Information

TechNova focuses on software products rather than physical consumer goods.

The company was founded in 2022.

The document does not provide annual revenue, profit, employee count, funding amount, valuation, or investor information.

11. Known Facts for Chatbot Testing
